

EMBRACING *Families*

WITH LOVE AND DIGNITY

When faced with making difficult decisions affecting your family, it's not always easy to know the best course of action.

In Doris Dildy's case, she made her wishes for hospice care known to her family.

The aggressive cancer that Mrs. Dildy faced caused her health to decline rapidly. Her family met with her physicians, Dr. Christine Barton and Dr. Keith Lerro, to discuss hospice care as an option.

"If you look at the people that helped us, they were like family. When they walked through the door, you just felt the warmth. They shared what our experience would be, what to expect. You can't predict what's going to happen, but the education process helped my family."

For nearly 25 years Hospice of Wilson Medical Center has been helping families just like the Dildys. Call 252-399-8924 to find out how we can assist your family.

Kelly Dildy, son of Doris Dildy
